

¿ Do you need another reason for owning an Aquathin ?

The Issue:

Each year, Americans purchase an estimated 29,000,000,000 plastic bottles of water.

Every day 60,000,000 of those bottles end up in our landfills.

Add to that the 17,000,000 barrels of oil it takes to produce the plastic bottles, the oil it takes to transport the bottles...and it adds up to a MAJOR Problem.

The Solution:
Not one Aquathin household contributes to this assault on our environment.
